PROFESSIONAL SUMMARY

Dynamic professional with a successful first career in higher education. Through hard work, dedication, and commitment to excellence I was able to attain my private license, instrument rating, commercial license, multi-add on, flight instructor certificate, and instrument instructor add-on in about a year. Eager to expand my knowledge and continue my growth in the aviation industry I intend to apply these same principles as I work to instruct students and attain my MEI certificate. These will help me in my progression to attain a pilot position where I can apply my knowledge and skills in every flight operation.
